**Subject:** Case against Microsoft--public input

I have followed the Microsoft charges since their inception due to my husband being in the computer industry (Director/software architect).

Please stop the government intrusion into the free market. The persecution against Microsoft needs to end. It is apparent that this successful industry was the one area that was functioning and growing exponentially free from the governmental intrusion that is existent everywhere else and that could not be allowed to continue. Let the free market prevail and put the government dollars/energy into Constitutionally directed areas, i.e. national defense.

Thank you for your serious consideration of my observations.
